

Resilient & Ready

Will you be the next farm to be part of our immersive, three-year programme of training, technical support and mentoring which will make your business more **Resilient & Ready** for the future?

CORTEVA[™]
agriscience

What is Resilient & Ready?

Corteva Agriscience and LEAF (Linking Environment And Farming) have collaborated to create a dynamic programme of professional training, consultancy, mentoring and product trials which will fast-track farmers towards a more sustainable and resilient future.

Based on LEAF's Integrated Farm Management principles, Resilient & Ready farmers receive professional advice and mentoring from experts in sustainable farm management, soil health and biodiversity. Farmers will be among the UK's first to try innovative products from Corteva Agriscience.

With a huge amount of enthusiasm and support from Corteva and LEAF, selected farmers will quickly progress to become champions and industry leaders in more sustainable farming.

Why join the programme?

Improve your farm's sustainability credentials and build business resilience

Gain the confidence to take on new projects and challenges

Become a LEAF Demonstration Farm

Raise the profile of your farm to become an industry leader in more sustainable farming

" We wanted to be ahead of the curve and to promote a sustainable farming system. "

**Harriet Ross & Ben Lowe,
Newseat of Dumbreck Farm**
