

Environmental Information Sheet

KERB* FLO

MAPP 13716

A 400 g/litre suspension concentrate formulation containing propyzamide, a benzamide residual herbicide for use in winter oilseed rape and several other agricultural and horticultural crops, and in forestry and amenity situations

Maximum individual dose: 1.75 - 4.25 l/ha (700 - 1700 g/ha propyzamide)

Maximum no. treatments: 1 per crop or year (depending on crop)

Section	Profile
1. WILDLIFE Mammals and Birds	KERB FLO is not classified ' <i>Harmful to game, wild birds and animals</i> ' No risk management necessary to protect wild mammals and birds. KERB FLO has a low toxicity to mammalian and bird species. The risk to wild mammals and birds feeding on treated areas is low.
2. BEES	No risk management necessary, and there is no requirement to avoid application of the product when bees may be foraging on flowering weeds.
3. NON TARGET INSECTS AND OTHER ARTHROPODS	No risk management is necessary. KERB FLO has a low risk to a range of non-target arthropods such as rove beetles, ladybirds, predatory mites and parasitic wasps.
4. AQUATIC LIFE	KERB FLO is classified " <i>Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment</i> ". KERB FLO has moderate toxicity to fish, <i>Daphnia</i> and algae. Care must be taken to avoid contamination of water with the product or its container. No risk management necessary. When used according to label instructions there will not be sufficient exposure to water to present a risk to aquatic life. Not categorised under the LERAP scheme.

Environmental Information Sheet

KERB* FLO

MAPP 13716

Section	Profile
5. SOIL and GROUNDWATER	Propyzamide is of moderate persistence and its metabolites are of low to moderate persistence; all are of low to moderate mobility. However when used as directed there is a low risk of groundwater contamination.
Earthworms	KERB FLO is of low toxicity to earthworms. The risk to earthworms is low and no risk management is necessary.
Soil Micro-organisms	KERB FLO has a low risk to soil micro-organisms and no risk management is necessary
6. NON-TARGET PLANTS	KERB FLO is a herbicide, therefore care should be taken to minimise drift onto hedgerows, conservation headlands etc. in order to prevent damage to plants in adjacent areas.

ALWAYS READ THE LABEL: USE PESTICIDES SAFELY

Care must be taken to minimise the risk of surface water contamination from farmyard and field sources.
