This Safety Data Sheet adheres to the standards and regulatory requirements of Great Britain and may not meet the regulatory requirements in other countries.

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name : Zorvec™ Enicade™

Synonyms : B13124414
DPX-QGU42 100 g/L OD
Oxathiapiprin 100 g/L OD

1.2. Relevant identified uses of the substance or mixture and uses advised against

Use of the Substance/Mixture : Fungicide

1.3. Details of the supplier of the safety data sheet

Company : Du Pont (UK) Limited
4th Floor, Kings Court, London Road
Stevenage, Herts.
SG1 2NG
United Kingdom

Telephone : +44 (0) 1438 734 000

E-mail address : sds-support@che.dupont.com

1.4. Emergency telephone number

+(44)-870-8200418 (CHEMTREC)

Poison Centres may only possess information required for products in accordance with Regulation (EC) No 1272/2008 and national legislation.

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Skin sensitisation, Category 1 : H317: May cause an allergic skin reaction.

Chronic aquatic toxicity, Category 3 : H412: Harmful to aquatic life with long lasting effects.

2.2. Label elements
SAFETY DATA SHEET according to Regulation (EC) No 1907/2006 -
Annex II

Zorvec™ Enicade™
Version 2.0
Revision Date 08.12.2017
Ref. 130000124356

Warning

H317 May cause an allergic skin reaction.
H412 Harmful to aquatic life with long lasting effects.

Special labelling of certain
substances and mixtures
EUH401 To avoid risks to human health and the environment, comply with the
instructions for use.

P261 Avoid breathing vapours or spray.
P280 Wear protective gloves/ protective clothing.
P302 + P352 IF ON SKIN: Wash with plenty of soap and water.
P333 + P313 If skin irritation or rash occurs: Get medical advice/ attention.
P363 Wash contaminated clothing before reuse.
P391 Collect spillage.
P501 Dispose of contents to an approved incineration plant in accordance with local,
regional and national legislations.
P501 Dispose of container to a waste disposal plant in accordance with local,
regional and national legislations.

SP 1 Do not contaminate water with the product or its container (Do not clean
application equipment near surface water/Avoid contamination via drains from
farmyards and roads).
SPe 3 To protect aquatic organisms respect an unsprayed buffer zone to surface
water bodies. Refer to the label to know the distance.
SPe 8 Dangerous to bees. Refer to the label to know the recommendation.

2.3. Other hazards

This mixture contains no substance considered to be persistent, bioaccumulating and toxic (PBT).
This mixture contains no substance considered to be very persistent and very bioaccumulating (vPvB).

SECTION 3: Composition/information on ingredients

3.1. Substances
Not applicable

3.2. Mixtures

The above products are compliant to REACH registration obligations; Registration number(s) may not be provided because substance(s) are exempted, not yet registered under REACH or are registered under another regulatory process (biocide uses, plant protection products), etc.

For the full text of the H-Statements mentioned in this Section, see Section 16.

**SECTION 4: First aid measures**

**4.1. Description of first aid measures**

**General advice**: Never give anything by mouth to an unconscious person. For specialist advice physicians should contact the National Poisons Information Service: Tel. 111 for England and Wales and Tel. 08454 24 24 24 for Scotland.

**Inhalation**: Move to fresh air. Consult a physician after significant exposure. Artificial respiration and/or oxygen may be necessary.

**Skin contact**: Take off contaminated clothing and shoes immediately. Wash off immediately with soap and plenty of water. In the case of skin irritation or allergic reactions see a physician. Wash contaminated clothing before re-use.

**Eye contact**: If easy to do, remove contact lens, if worn. Hold eye open and rinse slowly and gently with water for 15-20 minutes. If eye irritation persists, consult a specialist.

**Ingestion**: Call a physician or poison control centre immediately. Do not induce vomiting without medical advice. If victim is conscious: Rinse mouth with water. Drink 1 or 2 glasses of water.

**4.2. Most important symptoms and effects, both acute and delayed**

**Symptoms**: No cases of human intoxication are known and the symptoms of experimental intoxication are not known.

**4.3. Indication of any immediate medical attention and special treatment needed**

**Treatment**: Treat symptomatically.

**SECTION 5: Firefighting measures**

**5.1. Extinguishing media**

**Suitable extinguishing media**: Water spray, Dry chemical, Foam, Carbon dioxide (CO2)
Extinguishing media which shall not be used for safety reasons: High volume water jet, (contamination risk)

5.2. Special hazards arising from the substance or mixture

Specific hazards during firefighting: Hazardous decomposition products formed under fire conditions. Carbon dioxide (CO2) Nitrogen oxides (NOx)

5.3. Advice for firefighters

Special protective equipment for firefighters: Wear full protective clothing and self-contained breathing apparatus.

Further information: Prevent fire extinguishing water from contaminating surface water or the ground water system. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

(on small fires) If area is heavily exposed to fire and if conditions permit, let fire burn itself out since water may increase the area contaminated. Cool containers/tanks with water spray.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions: Control access to area. Keep people away from and upwind of spill/leak. Avoid dust formation. Avoid breathing dust. Use personal protective equipment. Refer to protective measures listed in sections 7 and 8.

6.2. Environmental precautions

Environmental precautions: Use appropriate container to avoid environmental contamination. Prevent further leakage or spillage if safe to do so. Do not flush into surface water or sanitary sewer system. Do not allow material to contaminate ground water system. Local authorities should be advised if significant spillages cannot be contained. If the spill area is porous, the contaminated material must be collected for subsequent treatment or disposal. If the product contaminates rivers and lakes or drains inform respective authorities.

6.3. Methods and materials for containment and cleaning up

Methods for cleaning up: Clean-up methods - small spillage Soak up with inert absorbent material. Sweep up or vacuum up spillage and collect in suitable container for disposal. Clean-up methods - large spillage Prevent further leakage or spillage. Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations (see section 13). Large spills should be collected mechanically (remove by pumping) for disposal. Collect leaking liquid in sealable (metal/plastic) containers. Collect and contain contaminated
absorbent and dike material for disposal.

Other information : Never return spills in original containers for re-use. Dispose of in accordance with local regulations.

6.4. Reference to other sections

For personal protection see section 8., For disposal instructions see section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Advice on safe handling : Wash hands before breaks and immediately after handling the product. Remove and wash contaminated clothing before re-use.

Use only according to our recommendations. Avoid contact with skin, eyes and clothing. Do not breathe dust or spray mist. Wear personal protective equipment. For personal protection see section 8. Prepare the working solution as given on the label(s) and/or the user instructions. Use prepared working solution as soon as possible - Do not store. Provide appropriate exhaust ventilation at places where dust is formed.

Advice on protection against fire and explosion : Keep away from heat and sources of ignition. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). To avoid ignition of vapours by static electricity discharge, all metal parts of the equipment must be grounded.

7.2. Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers : Store in a place accessible by authorized persons only. Store in original container. Keep in properly labelled containers. Keep containers tightly closed in a dry, cool and well-ventilated place. Keep out of the reach of children. Keep away from food, drink and animal feedingstuffs.

Advice on common storage : No special restrictions on storage with other products.

Other data : Stable under recommended storage conditions.

7.3. Specific end use(s)

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

If sub-section is empty then no values are applicable.

8.2. Exposure controls
Engineering measures: Ensure adequate ventilation, especially in confined areas. Use sufficient ventilation to keep employee exposure below recommended limits.

Eye protection: Safety glasses with side-shields conforming to EN166

Hand protection:
- Material: Nitrile rubber
- Glove thickness: 0.4 - 0.7 mm
- Glove length: Gauntlets
- Protection index: Class 6
- Wearing time: > 480 min

The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. The suitability for a specific workplace should be discussed with the producers of the protective gloves. Gloves must be inspected prior to use. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough. Gauntlets shorter than 35 cm long shall be worn under the combination sleeve. Gauntlets of 35 cm long or longer shall be worn over the combination sleeve. Before removing gloves clean them with soap and water.

Skin and body protection: When exceptional circumstances would require an access to the treated area before the end of re-entry periods, wear full protective clothing Type 6 (EN 13034), nitrile rubber gloves class 2 (EN 374) and nitrile rubber boots (EN 13832-3 / EN ISO 20345).

Manufacturing and processing work: Full protective clothing Type 6 (EN 13034)

When exceptional circumstances would require an access to the treated area before the end of re-entry periods, wear full protective clothing Type 6 (EN 13034), nitrile rubber gloves class 2 (EN 374) and nitrile rubber boots (EN 13832-3 / EN ISO 20345).

To optimize the ergonomy it may be recommended to use cotton underwear when wearing some fabrics. Take advice from supplier.

Garment materials that are resistant to both water vapour and air will maximise wearing comfort. Materials should be robust to maintain the integrity and barrier in use.

The permeation resistance of the fabric must be verified independently of the « type » protection recommended, to ensure an appropriate performance level of the material adequate to the corresponding agent and type of exposure.

Protective measures: The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. All chemical protective clothing should be visually inspected prior to use. Clothing and gloves should be replaced in case of chemical or physical damage or if contaminated. Only protected handlers may be in the area during application.
Hygiene measures: Handle in accordance with good industrial hygiene and safety practice. Regular cleaning of equipment, work area and clothing. Keep working clothes separately. Contaminated work clothing should not be allowed out of the workplace. Wash hands and face before breaks and immediately after handling the product. Remove clothing/PPE immediately if material gets inside. For environmental protection remove and wash all contaminated protective equipment before re-use. Dispose of rinse water in accordance with local and national regulations.

Respiratory protection: Manufacturing and processing work: Half mask with a particle filter FFP1 (EN149)

Mixer and loaders must wear: Half mask with a particle filter FFP1 (EN149)

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Form: liquid

Colour: off-white

Odour: oily, characteristic

Odour Threshold: not determined

pH: 6.5 (1% solution in water)

Melting point/range: Not available for this mixture.

Flash point: > 80 °C

Flammability (solid, gas): The product is not flammable.

Thermal decomposition: Not available for this mixture.

Auto-ignition temperature: 335 °C

Oxidizing properties: The product is not oxidizing.

Explosive properties: Not explosive

Lower explosion limit/ Lower flammability limit: Not available for this mixture.

Upper explosion limit/ upper flammability limit: Not available for this mixture.

Vapour pressure: Not applicable
Density: 0.99 g/cm³
Relative density: Not available for this mixture.
Water solubility: insoluble
Partition coefficient: n-octanol/water: Not applicable
Viscosity, dynamic: not determined
Relative vapour density: Not applicable
Evaporation rate: Not applicable

9.2. Other information
Phys.-chem./other information: No other data to be specially mentioned.

SECTION 10: Stability and reactivity
10.1. Reactivity: No hazards to be specially mentioned.
10.2. Chemical stability: The product is chemically stable under recommended conditions of storage, use and temperature.
10.3. Possibility of hazardous reactions: No dangerous reaction known under conditions of normal use. Polymerization will not occur. No decomposition if stored and applied as directed.
10.4. Conditions to avoid: To avoid thermal decomposition, do not overheat.
10.5. Incompatible materials: No materials to be especially mentioned.
10.6. Hazardous decomposition products: No hazardous decomposition products are known.

SECTION 11: Toxicological information
11.1. Information on toxicological effects
Acute oral toxicity
LD₅₀ / Rat: > 5,000 mg/kg
Method: OECD Test Guideline 425
Information source: Internal study report (Data on the product itself)

Acute inhalation toxicity
LC₅₀ / Rat: > 5.0 mg/l
Method: OECD Test Guideline 403
Information source: Internal study report (Data on the product itself)

Acute dermal toxicity

LD50 / Rat : > 5,000 mg/kg
Method: OECD Test Guideline 402
Information source: Internal study report (Data on the product itself)

Skin irritation

Rabbit
Result: No skin irritation
Method: OECD Test Guideline 404
Information source: Internal study report (Data on the product itself)

Eye irritation

Rabbit
Result: No eye irritation
Method: OECD Test Guideline 405
Information source: Internal study report (Data on the product itself)

Sensitisation

Guinea pig Maximisation Test
Result: May cause sensitisation by skin contact.
Method: OECD Test Guideline 406
Information source: Internal study report (Data on the product itself)

Repeated dose toxicity

- Oxathiapiprolin
  Oral - feed Rat
  Method: OECD Test Guideline 407
  No toxicologically significant effects were found., Organ weight changes, Information source: Internal study report

  Oral - feed Dog
  Minimal effects that do not meet the threshold for classification., Organ weight changes, Information source: Internal study report

Mutagenicity assessment

- Oxathiapiprolin
  Tests on bacterial or mammalian cell cultures did not show mutagenic effects. Animal testing did not show any mutagenic effects.

Carcinogenicity assessment

- Oxathiapiprolin
Animal testing did not show any carcinogenic effects.

Toxicity to reproduction assessment

- Oxathiapiprolin
  No toxicity to reproduction Minimal effects that do not meet the threshold for classification. Slight delays in maturation observed in rats.

Assessment teratogenicity

- Oxathiapiprolin
  Animal testing showed no developmental toxicity.

STOT - single exposure

The substance or mixture is not classified as specific target organ toxicant, single exposure.

STOT - repeated exposure

The substance or mixture is not classified as specific target organ toxicant, repeated exposure.

Aspiration hazard

The mixture does not have properties associated with aspiration hazard potential.

SECTION 12: Ecological information

12.1. Toxicity

Toxicity to fish

* LC50 / 96 h / Oncorhynchus mykiss (rainbow trout): > 10 mg/l
  Method: OECD Test Guideline 203
  Information given is based on tests on the mixture itself. Information source: Internal study report

Toxicity to aquatic plants

* ErC50 / 72 h / Pseudokirchneriella subcapitata (green algae): > 3.5 mg/l
  Method: OECD Test Guideline 201
  Information given is based on tests on the mixture itself. Information source: Internal study report

Toxicity to aquatic invertebrates

* EC50 / 48 h / Daphnia magna (Water flea): > 9.62 mg/l
  Method: OECD Test Guideline 202
  Information given is based on tests on the mixture itself. Information source: Internal study report

Toxicity to soil dwelling organisms

* LD50 / 28 d / Eisenia fetida (earthworms): > 1,000 mg/kg Soil
  (Data on the product itself) Information source: Internal study report
Toxicity to other organisms

- **LC50 / 48 h / Apis mellifera (bees):** >1348.76 µg/b
  Method: OECD Test Guideline 213
  Oral (Data on the product itself) Information source: Internal study report

- **LC50 / 48 h / Apis mellifera (bees):** >981.35 µg/b
  Method: OECD Test Guideline 214
  Contact (Data on the product itself) Information source: Internal study report

- **LD50 / Colinus virginianus (Bobwhite quail):** > 2.250 mg/kg
  Method: US EPA Test Guideline OPPTS 850.2100
  (Data on the product itself) Information source: Internal study report

- **LC50 / 8 d / Colinus virginianus (Bobwhite quail):** > 5.620 mg/kg
  Method: US EPA Test Guideline OPPTS 850.2200
  (Data on the product itself) Information source: Internal study report

**Chronic toxicity to fish**

- **Oxathiapiprolin**
  Early Life-Stage / NOEC / 35 d / Cyprinodon variegatus (sheepshead minnow): 0.34 mg/l
  Method: US EPA Test Guideline OPPTS 850.1400
  Information source: Internal study report

**Chronic toxicity to aquatic Invertebrates**

- **Oxathiapiprolin**
  Semi-Static-Life-Cycle / NOEC / 21 d / Daphnia magna (Water flea): 0.75 mg/l
  Method: OECD Test Guideline 211
  Information source: Internal study report

  flow-through test / NOEC / 32 d / Americamysis baia (mysid shrimp): 0.058 mg/l
  Method: OPPTS 850.1350
  Information source: Internal study report

**12.2. Persistence and degradability**

**Biodegradability**

Not readily biodegradable.
Estimation based on data obtained on active ingredient.

**12.3. Bioaccumulative potential**

**Bioaccumulation**

Does not bioaccumulate. Estimation based on data obtained on active ingredient.

**12.4. Mobility in soil**
Mobility in soil

The product is not expected to be mobile in soils.

12.5. Results of PBT and vPvB assessment

PBT and vPvB assessment
This mixture contains no substance considered to be persistent, bioaccumulating and toxic (PBT). / This mixture contains no substance considered to be very persistent and very bioaccumulating (vPvB).

12.6. Other adverse effects

Additional ecological information

No other ecological effects to be specially mentioned

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Product: In accordance with local and national regulations. Must be incinerated in a suitable incineration plant holding a permit delivered by the competent authorities. Do not contaminate ponds, waterways or ditches with chemical or used container.

Contaminated packaging: Do not re-use empty containers.

SECTION 14: Transport information

ADR
14.1. UN number: 3082
14.2. UN proper shipping name: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (Oxathiapiprolin)
14.3. Transport hazard class(es): 9
14.4. Packing group: III
14.5. Environmental hazards: For further information see Section 12.

14.6. Special precautions for user: Tunnel restriction code: (-)

IATA_C
14.1. UN number: 3082
14.2. UN proper shipping name: Environmentally hazardous substance, liquid, n.o.s. (Oxathiapiprolin)
14.3. Transport hazard class(es): 9
14.4. Packing group: III
14.5. Environmental hazards: For further information see Section 12.

14.6. Special precautions for user: DuPont internal recommendations and transport guidance: ICAO / IATA cargo aircraft only
IMDG
14.1. UN number: 3082
14.2. UN proper shipping name: Environmentally hazardous substance, liquid, n.o.s.
   (Oxathiapiprolin)
14.3. Transport hazard class(es): 9
14.4. Packing group: III
14.5. Environmental hazards: Marine pollutant
14.6. Special precautions for user: No special precautions required.
14.7. Transport in bulk according to Annex II of Marpol and the IBC Code Not applicable

SECTION 15: Regulatory information
15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Other regulations:
The product is classified as dangerous in accordance with Regulation (EC) No. 1272/2008.
Take note of Dir 94/33/EC on the protection of young people at work.
Take note of Dir 92/85/EEC on the safety and health at work of pregnant workers.
Take note of Directive 98/24/EC on the protection of the health and safety of workers from the risks related to chemical agents at work.
Take note of Directive 96/82/EC on the control of major-accident hazards involving dangerous substances.
This product is in full compliance according to REACH regulation 1907/2006/EC.

15.2. Chemical safety assessment
A Chemical Safety Assessment is not required for this/these product(s).
The mixture is evaluated within the frame of the provisions of Regulation (EC) No. 1107/2009.

SECTION 16: Other information
Full text of H-Statements referred to under section 3.

H400 Very toxic to aquatic life.
H410 Very toxic to aquatic life with long lasting effects.
