This summary sheet provides information on tank-mixes conducted with this product. Corteva Agriscience™ gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk.

**Important Note:** Do not use any tank-mix if the mixture cannot be applied within the label recommendations for individual products or if specific tank-mix restrictions apply.

Larger, more complicated mixes; unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank-mix request please contact your local Corteva representative or call the Technical Hotline on 0800 689 8899

Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, PH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank-mix partners. Where only Physical Compatibility or Spray able with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

### NOTES:

**Application Guidelines** - When applying with liquid fertilisers add the required amount of Instinct to fertiliser, whilst maintaining constant agitation. This will ensure a uniform mixing of Instinct and fertiliser so ensuring a stable emulsion of Instinct in the liquid fertiliser.

When applying with water, add half required volume of water and begin agitation. Add required amount of Instinct into partially filled spray tank. Maintain agitation whilst topping up tank and during spraying.

### Changes

21 st April - addition of Liberator and Sempre XL; 24th February 2025 - list reviewed and Envy, Quelex added
