This summary sheet provides information on tank-mixes conducted with this product. Corteva Agriscience™ gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk.
Important Note: Do not use any tank-mix if the mixture cannot be applied within the label recommendations for individual products or if specific tank-mix restrictions apply.
 Larger, more complicated mixes; unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank-mix request please contact your local Corteva representative or call the Technical Hotline on 0800 689 8899
 Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, PH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank-mix partners. Where only Physical Compatibility or Spray able with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

NOTES

Palio should always be used with an approved adjuvant.

Topik is supported in mix with Palio up to the end of February.

Ø Residual herbicides can be used in mixture or short sequence with Palio, while conditions are favourable for both products to work and weeds are small and actively growing. However, once soil moisture declines to reduce residual activity then a 4 week interval between the residual herbicide and an application of Palio is recommended to maximise grass weed control and the tank-mix is no longer supported.

* Do not exceed maximum total dose of florasulam within growing season

** Corteva Agriscience only support compatibilities with Palio and SC formulations of tebuconazole NOT the EW formulations as it causes an additive PGR effect and possible crop damage

† Corteva Agriscience only support Palio in a 2-way tank mix with half rate chlormequat due to crop safety issues. An intervals of at least 7 days must be regarded before applying a higher rate of chlormequat or any other PGR.

Do not mix Palio with OPs, MCPA and Dicamba

For products containing MCPA or Dicamba respect a 14 day interval between them and Broadway Star.

Do not harrow or roll within 7 days before or after an application of Broadway Star.

Updates

Products Removed - Absolute, Ally Express, Aria, Bullion, Ductis SX, Exceed SX, Excalibur,, GEX 353, Headland Surefire Gold, Image, Lexus SX, Oklar SX, Oriol SX, Oxytril CM, Primus 25EC, Quantum SX, Staka SX, Triad, Acanto, Acanto Prima, Centaur, Demeo, Ennobe, Excelsior, Flamenco, Landmark, Menara, Olympus SC, Orka, Poraz, Torch, Torch Extra, Dimethoate
 26th November 2019 - added Lantern, Tower
 22nd January 2020 - changed Toppel 10 to Permasect 500 EC; 28th January 2021 - removal of withdrawn products; 11th March 2021 - addition of Clayton Comply, Clayton Obey, Clayton Sparta, Decoy 250EC, Kusti, Mirror, Mojave, Nevada, Quidam, Roxy, Serpent, Syrex, Tempest, Torres, Vegas; 22nd March 2021 - addition of Azoxystar, Calite Extra, Firefly, Impact, Iodus, Multiple Pro, Sakura and Terrasorb Foliar Extra, removal of multi-way mixes with Defy; 23rd March 2021 - addition of Biopower, Monkey and Orius P ; 24th March 2021 - addition of Nelson; 13th April 2021 - addition of Revystar XE and alternative brands, Diadem XE, Mivyo XE, Provyto XE, and Vervydor XE ; 29th April 2021 - updated list to include Silvron Pro, Kavatur Plus, Myresa, Sven and additional trace elements
