

Technical Information Sheet

Grandstand® is a post emergence herbicide for use on managed amenity turf for the control of a wide range of broad-leaved weeds, including daisy, dandelion, clover, buttercup and plantain.

Key facts

Product Registration Number:	MAPP No. 20724
Active Ingredient:	5g/litre Florasulam + 6.25g/litre Arylex™ (halauxifen-methyl) (HRAC Group 2 & 4 herbicides)
Pack size:	3.0 L
Formulation:	Oil Dispersion (Liquid)
Maximum Individual Dose:	1.2 L/ha
Maximum Total Dose:	1.2 L/ha per calendar year
Maximum Number of applications:	One application of Grandstand® per season
Application Timing:	1 st April - 30 th September
Following crops	After an application of Grandstand® there are no restrictions for sowing any succeeding crop after application. However, for sensitive species such as clover or sunflower ploughing is recommended prior to drilling.
Water Volumes:	200-500 L/ha
Spray Quality:	Medium as defined by BCPC
Rainfastness	Grandstand is rainfast one hour after application
Buffer Zone:	5m reducible buffer zone (1m dry ditches)

How to get the best from Grandstand®

- Grandstand® can be applied to established managed amenity turf including lawns. Newly sown turf needs to become established before treating.
- Apply to small and actively growing weeds.
- Avoid mowing 3 days before and 7 days after application to ensure sufficient weed leaf surface for application and translocation into the roots.
- Do not apply if the turf is wet.
- Do not apply if the turf is under stress, especially from variable temperatures, drought or cold, dry weather.
- Grass clippings must be composted for a minimum of 4 months before being used as a mulch.
- The use of low drift nozzles is recommended and don't spray on a windy day.
- Don't spray when temperatures are more than 25°C in the shade.
- Do not apply with hand-held equipment.
- To avoid subsequent injury to sensitive crops, spray equipment used for Grandstand applications should be thoroughly cleaned with All Clear Extra or a similar proprietary tank cleaner.

Turf Safety

Grandstand® has been found to be safe on the following range of grass species:

Timothy	Fescue spp.
Annual meadow-grass	Perennial & Italian ryegrass
Cock's foot	Smooth meadow grass
Common bent	Creeping bent
Rescue brome	

However, as there are many different cultivars grown, it may be best to test a small area of turf for safety before overall application.

Weed Spectrum: Label Weeds at 1.2l/ha

Weed Species	Maximum growth stage controlled	Susceptibility
Daisy	Up to flowering	S
Dandelion	Up to flowering	S
White clover	Up to flowering	S
Creeping buttercup	Up to flowering	MS
Ribwort plantain	Up to stem extension	MS

Key:

S – susceptible

MS – moderately susceptible

Weed Spectrum: Non-label Weeds at 1.2l/ha

Weed Species	Susceptibility
Black Bindweed	S
Cat's ear	S
Chickweed	S
Docks, from seed	S
Hawkweed	S
Mayweed	S
Mouse-ear chickweed	S
Nettle, small	S
Self heal	S
Shepherd's Purse	S
Yarrow	S
Bird's Foot Trefoil	MS
Black Medick	MS
Field Bindweed	MS
Hogweed	MS
Rosebay Willowherb	MS
Thistle, from seed	MS

Non label weed information based on anecdotal or limited data and is only indicative and should not be considered as a recommendation for use on the part of Corteva Agriscience. The user assumes full responsibility for use on these weeds.
