

Leystar is a selective herbicide controlling a wide spectrum of broad-leaved weeds in forage maize.

Key facts

Product Registration Number:	MAPP 19938 (replaces 17921)
Active Ingredient:	100 g / litre fluroxypyr + 80 g / litre clopyralid + 2.5 g / litre florasulam
Pack size:	2.0 L
Formulation:	Emulsifiable concentrate
Maximum Individual Dose:	1.0 L/ha maize
Maximum Total Dose:	1.0 L/ha to maize
Application Timing:	10 April to 30 June (BBCH 13 – 16) for maize
Water Volumes:	200 L/ha maize
Spray Quality:	Medium as defined by BCPC
Buffer Zone:	5m reducible aquatic buffer

Key benefits

- 3 actives delivering effective translocation and wide spectrum weed control.
- A utility solution with a label that also enables use in grassland and cereals
- Controls key weeds such as chickweed, mayweeds, seedling docks and thistles.
- Handy pack which treats 2 ha / 5 acres at 1.0 L/ha.
- Rainfast in 2 hours .

Best use advice - Maize

- Apply when forage maize is between 3-6 leaf stage, and before the crop is over 20 cm tall. Do not apply once the buttress roots have started to develop on the first node.

- Crops that can be sown in the year of treatment with Leystar to forage maize include:
 - Cereals, oilseed rape, grass and vegetable brassicas as transplants.
- To protect surface water, do not apply to maize before 10th April.
- To avoid subsequent injury to crops other than grassland and cereals, all spraying equipment must be thoroughly cleaned using All Clear Extra spray cleaner.
- Tank mixes not currently permitted on maize.
