

Technical Information Sheet

Starane Hi-Load HL is a selective post-emergence herbicide for use on winter and spring cereals, forage maize, grass seed crops and new sown leys to control a range of annual weeds.

Key facts

Product Registration Number:	MAPP No. 16557
Active Ingredient:	333 g/litre fluroxypyr (HRAC Group 4 herbicide)
Pack size:	5 Litres
Formulation:	Emulsifiable concentrate
Maximum Individual Dose:	0.6 L/ha (Winter Wheat, Barley, Rye and Oats; Triticale, Spelt, Durum Wheat & Forage Maize) 0.45 L/ha (Spring Wheat, Barley, Rye and Oats; Grass for Seed; New Sown Grass Ley)
Maximum Total Dose:	As above
Latest Application Timing:	GS45 in Winter Wheat and Winter Barley. GS39 in Triticale, Spring Wheat, and Spring Barley GS31 in Rye, Oats, Spelt, Durum Wheat Before seven leaves unfolding stage in Forage Maize
Grazing Interval:	Keep livestock out of treated areas for at least 3 days and until poisonous weeds have died and become unpalatable
Water Volumes:	200 – 400 L/ha label rate Can be used at full dose down to 80L/ha
Spray Quality:	Medium as defined by BCPC
Nozzles:	CFF, VPF, Air inclusion and Twin Fluid Nozzles
Buffer Zone:	5 m Aquatic Buffer Zone – can be reduced following a LERAP assessment

Key Benefits

- The newest addition to the tried and trusted Starane brand, in a higher concentration.
- For use on a wide range of crops: Winter cereals (wheat, barley, oats, rye), spring cereals (wheat, barley, oats, rye), triticale, durum wheat, spelt, forage maize, grass seed crops, new sown grass leys (see EAMUs for further non-label crops including onion, shallot, garlic, leek, salad onion, morphine poppy, sweetcorn, meadowfoam and crops grown for game cover).
- Concentrated formulation = less packs per tank.
- No following crop restrictions.
- Less packaging waste per hectare- fewer packs required.
- Starane Hi-Load HL provides outstanding tank-mix compatibility.
- No known resistance in any target species.

Key: **bold**-label weeds, TL – true leaves, BFBV – Before Flower Buds Visible, BF – Before Flowering

Non-Label weeds listed as an indication of the effect that would be expected to be achieved based on limited data - these are not recommendations; just an indication of what effects might be achieved.

To complete the weed spectrum tank-mix with a sulfonyl-urea herbicide such as Jubilee SX.
