CLEANING PROCEDURE

- 1.** Immediately after spraying, drain tank completely. Any contamination on the outside of the spraying equipment should be removed by washing with clean water.
- 2.** Rinse inside of the tank with clean water and flush through boom and hoses using at least one-tenth of the spray volume. Drain tank completely, including the sump.
- 3.** Half fill the tank with clean water and add DuPont ALL CLEAR EXTRA at the recommended rate. Agitate and then flush the boom and hoses with the cleaning solution. Top up with water making sure the tank is completely full and allow to stand for 15 minutes with agitation. Again flush the boom and hoses and drain tank completely.
- 4.** Nozzles and filters should be removed and cleaned separately with an ALL CLEAR EXTRA solution containing 50 ml of ALL CLEAR per 10 litres of water.
- 5.** Rinse the tank with clean water and flush through the boom and hoses using at least one-tenth of the spray volume. Drain tank completely.
- 6.** For the disposal of washings, follow the 'Code of Practice for using plant protection products' (DEFRA publications 2006). (UK only). Do not spray onto sensitive crop or land intended for imminent planting with sensitive crops.

Note: If it is not possible to drain the tank completely, step 3 must be repeated before going to step 4.

DuPont accept no liability for damage occurring as a result of failure to comply with instructions on this label.
