

(Label main area front panel- foil pack)

**SAFARI LITE™
MAPP 17954**

A blend of water dispersible granules and wettable powder contained in a water-soluble bag and containing 714 g/kg lenacil and 54 g/kg triflurosulfuron methyl for weed control in sugar beet.

The (COSHH) Control of Substances Hazardous to Health Regulations may apply to the use of this product at work.

SAFETY PRECAUTIONS

AFTER TEARING OPEN FOIL ENVELOPE, DROP THE WATER SOLUBLE BAG STRAIGHT INTO THE SPRAY TANK. DO NOT OPEN THE WATER SOLUBLE BAG. DO NOT TOUCH THE WATER SOLUBLE BAG WITH WET HANDS OR GLOVES. USE IMMEDIATELY. READ MIXING INSTRUCTIONS FOR FURTHER INFORMATION. ENSURE ALL OTHER LABEL CONDITIONS ARE FOLLOWED.

OPERATOR PROTECTION

Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment.

Operators must wear suitable protective gloves when handling the product.

However, engineering controls may replace personal protective equipment if a COSHH assessment shows they provide an equal or higher standard of protection.

WASH CONCENTRATE from skin and eyes immediately

DO NOT BREATHE SPRAY

DO NOT TOUCH WATER SOLUBLE BAG

WHEN USING DO NOT EAT DRINK OR SMOKE

WASH HANDS AND EXPOSED SKIN before meals and after smoking

ENVIRONMENTAL PROTECTION

DO NOT CONTAMINATE SURFACE WATERS OR DITCHES with chemical or used container

DO NOT ALLOW DIRECT SPRAY from horizontal boom sprayers to fall within 5 m of the top of the bank of a static or flowing water body, unless a Local Environment Risk Assessment for Pesticides (LERAP) permits a narrower buffer zone, or within 1 m of the top of a ditch which is dry at the time of application. DO NOT ALLOW DIRECT SPRAY from hand-held sprayers to fall within 1 m of the top of the static or flowing water body.

Aim spray away from water

This product qualifies for inclusion within the Local Environment Risk Assessment for Pesticides (LERAP) scheme. Before each spraying operation from a horizontal boom sprayer, either a LERAP must be carried out in accordance with CRD's published guidance or the statutory buffer zone must be maintained. The results of the LERAP must be recorded and kept available for three years.

Spray must be aimed away from water.

Spray from hand-held sprayers must not be allowed to fall within 1m of the top of the bank of a static or flowing waterbody.

STORAGE AND DISPOSAL

KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDING STUFFS

KEEP OUT OF REACH OF CHILDREN

KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place

Contents: 280 g

'Safari Lite WSB'

HERBICIDE

Containing 714 g/kg lenacil and 54 g/kg triflusulfuron methyl

WARNING

Very toxic to aquatic life with long lasting effects.

Suspected of causing cancer

Keep out of reach of children

Do not eat, drink or smoke when using this product

Contaminated work clothing should not be allowed out of the workplace

Avoid release to the environment

If exposed or concerned: Get medical advice/attention

Wash contaminated clothing before re-use.

Collect spillage.

Dispose of contents / container to a licensed hazardous-waste disposal contractor or collection site except for empty clean containers which can be disposed of as non-hazardous waste

Do not contaminate water with the product or its container (Do not clean application equipment near surface water/Avoid contamination via drains from farmyards and roads).

To avoid risks to human health and the environment, comply with the instructions for use

IMPORTANT INFORMATION

FOR USE ONLY AS A PROFESSIONAL HERBICIDE

Crops: Sugar beet

Maximum individual dose: 280 g/ha

Maximum number of treatments: 2 per crop

Latest time of application: Before the leaves of the crop meet between the rows

Other Specific Restrictions:

This product should only be applied after BBCH10 growth stage

This product qualifies for inclusion within the Local Environment Risk Assessment for Pesticides (LERAP) scheme. Before each spraying operation from a horizontal boom sprayer, either a LERAP must be carried out in accordance with HSE's published guidance or the statutory buffer zone must be maintained. The results of the LERAP must be recorded and kept available for three years.

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS

-----(*Start of label leaflet*)-----

DIRECTIONS FOR USE

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

Restrictions

- 'Safari Lite WSB' must not be applied to any crop suffering from stress as a result of drought, water-logging, low temperatures, pest or disease attack, nutrient or lime deficiency or other factors reducing crop growth.
- Due to the high level of activity of the herbicide, special care must be taken to avoid damage by drift onto plants outside the target area, or onto surface waters or ditches. Thorough cleansing of equipment is also very important - see below.
- Do not apply more than four applications of products containing triflurosulfuron methyl per crop
- Do not use on crops grown for seed

Weed Control

'Safari Lite WSB' contains two active substances with foliar and residual activity. When tank-mixed with a suitable herbicide partner it controls a wide range of broad-leaved weeds. It is most effective if applied when the weeds are small and actively growing. Good

spray cover of weeds must be obtained. Susceptible plants cease growth almost immediately after application and symptoms can be seen about 5 to 10 days after application. The susceptibility ratings of weeds in the following table refer to good spray cover and good growing conditions, with weed size of up to 2 true leaves.

Weed Species	Safari Lite WSB 280G/HA + 1.1 L/ha phenmedipham*
Black-bindweed	S
Charlock	S
Chickweed	S
Cleavers	S
Fat-hen	S
Field Pansy	S
Fool's Parsley	S
Fumitory	S
Knotgrass	S
Mayweed, Scentless	S
Red Dead-nettle	S
Redshank	S
Small Nettle	S
Volunteer Oilseed Rape	S

S = Fully susceptible

*containing 160 g/lt phenmedipham

Resistance

When herbicides with the same mode of action are used repeatedly over several years in the same field, selection of resistant biotypes can take place. These can propagate and may become dominating. A weed species is considered resistant to a herbicide if it survives a correctly-applied treatment at the recommended dose. Development of resistance within a weed species can be avoided or delayed by alternating (or tank-mixing) with suitable products having a different mode of action.

Crops

'Safari Lite WSB' can be used on all varieties of sugar beet at the growth stages given below.

Timing

Application should be made when the first weeds have emerged and when the beet has reached the cotyledon stage. Subsequent applications of herbicides should be applied as new flushes of weeds emerge.

Volume and Application

BEFORE USING 'Safari Lite WSB', SPRAYING EQUIPMENT MUST BE CLEAN AND FREE FROM CONTAMINATION WITH OTHER PESTICIDES.

Overall Application

'Safari Lite WSB' should be applied overall in 80 - 150 litres of water per hectare, using suitable equipment to give a FINE spray, as defined by BCPC. Good, even spray cover of the weeds is essential for best results. Care should be taken not to overlap spray swaths.

Band Application

Similar doses, water volumes and spray quality should be used as in overall application, but the area covered will be dependent upon the row spacing and bandwidth. Careful calibration is essential to achieve best results.

Dose

'Safari Lite WSB' should be applied at 280g/ha (1 water-soluble bag/ha) in conjunction with a suitable herbicide tank-mix partner (see Weed Susceptibility Table).

Mixing

'Safari Lite WSB' mixes easily with water, but the following mixing procedure should be followed: Quarter-fill the spray tank with clean water and start agitation. Tear open foil envelope and add the water-soluble bag directly to the spray tank and complete filling. Maintain agitation until spraying is completed. For mixing instructions with phenmedipham as a tank-mix partner, see Compatibility Section.

Compatibility

In any tank-mix, with the exception of phenmedipham containing products, add 'Safari Lite WSB' to the spray tank first and ensure it is fully dispersed before adding the partner product(s). If a partner product contains phenmedipham, follow the manufacturer's recommendations for mixing that product before adding 'Safari Lite WSB'. 'Safari Lite WSB' can be tank-mixed with approved formulations containing:

phenmedipham (M14192);

phenmedipham and desmedipham (M14186);

Products should only be tank-mixed if each product can be applied within the manufacturer's label recommendation for its use. When 'Safari Lite WSB' tank-mixes are used in sequence with graminicides, the minimum time interval should be observed between applications in accordance with the manufacturer's recommendations. For further information contact your DuPont distributor.

Spray tank clean-out

TO AVOID SUBSEQUENT DAMAGE TO CROPS OTHER THAN SUGAR BEET, IMMEDIATELY AFTER SPRAYING 'Safari Lite WSB' THOROUGHLY CLEAN ALL SPRAY EQUIPMENT INCLUDING INSIDE AND OUTSIDE OF LID USING ALL CLEAR[®] EXTRA SPRAYER CLEANER ACCORDING TO THE LABEL INSTRUCTIONS.

1. Immediately after spraying, drain tank completely. Any contamination on the outside of the spraying equipment should be removed by washing with clean water.
2. Rinse inside of tank with clean water and flush through boom and hoses using at least one-tenth of the spray tank volume. Drain tank completely.
3. Half fill tank with clean water and add DuPont ALL CLEAR EXTRA at the recommended rate. Agitate and then flush the boom and hoses with the cleaning solution. Top up with water making sure the tank is completely full and allow to stand for 15 minutes with agitation. Again flush the boom and hoses and drain tank completely.
4. Nozzles and filters should be removed and cleaned separately with an ALL CLEAR EXTRA solution containing 50 ml of ALL CLEAR EXTRA per 10 litres of water.
5. Rinse the tank with clean water and flush through the boom and hoses using at least one-tenth of the spray tank volume. Drain tank completely.
6. For disposal of washings, follow the 'Code of Practice for Using Plant Protection Products' (DEFRA Publications,2006). Do not spray onto sensitive crop or land intended for cropping with sensitive crop.

NOTE: If it is not possible to drain the tank completely, step 3 must be repeated before going on to step 4.

Weather

Avoid high light intensity (full sunlight) and high temperatures (above 21°C) on the day of spraying. Avoid periods of substantial day to night temperature changes or when frost is expected.

Succeeding Crops

After applying 'Safari Lite WSB' to a sugar beet crop, only cereals should be sown in the same calendar year. Any crop may be sown or planted in the following spring (i.e. next calendar year). In the event of crop failure for any reason, ploughing and cultivation to a depth of at least 15cm should be carried out. Sow only beet within four months of application of 'Safari Lite WSB', provided this agrees with the recommendations of any partner product.

WARNING

EXTREME CARE SHOULD BE TAKEN TO AVOID DAMAGE BY DRIFT OF SPRAY ONTO PLANTS OUTSIDE THE TARGET AREA OR ONTO SURFACE WATERS OR DITCHES. SPRAYING EQUIPMENT SHOULD NOT BE DRAINED OR FLUSHED ONTO LAND PLANTED WITH OR INTENDED FOR PLANTING WITH TREES OR CROPS OTHER THAN SUGAR BEET.

NOTICE TO BUYER

All goods supplied by us are of a high grade and we believe them to be suitable for any purpose for which we expressly supply them, but as we cannot exercise control over their mixing or use, all conditions and warranties statutory or otherwise, as to the quality or fitness for any purpose of our goods are excluded and no responsibility will be accepted by us for any damage or injury whatsoever arising from their storage, handling, application or use
